

**i have to close and reopen arcview everytime i run kineros...**

Posted by quantumk - 2008/07/09 18:28

---

or it doesn't work the next time i run it. is there any way around this aggravation?

Hi,

We'd like to help you figure this out but need more information.

Can you tell us what kind of error or warning message you get when you try to run KINEROS again?  
What exactly happens?

Does KINEROS run completely the first time?

Thanks,  
Lainie
